

2026 Health Equity Committee Roster

Purpose: The Health Equity Committee (HEC) is charged with advancing health equity and reducing disparities through the lens of infection prevention and control (IPC), with a particular focus on addressing regulations, systems, policies, and institutions for which inequities result in adverse health conditions and outcomes of disadvantaged populations including racial/ethnic minorities and populations of lower socioeconomic status. Our initial goals are to understand and develop strategies, engagement of stakeholders for policy changes, collaboration, health literacy, cultural competency, and training a diverse group of Infection Preventionists.
